

# Semi-Automatic Pack Station

Model:

# PP-563BE

*holds box in place for easy loading*

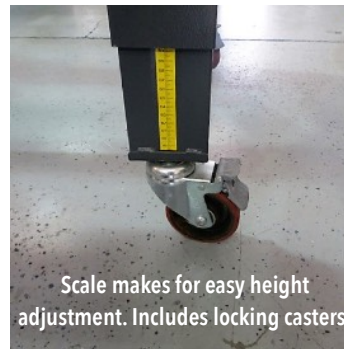

*Shown with the PP-554 Tape Machine*

## DESCRIPTION

The operator simply opens up and squares a flat box, loads it into the pack station, uses the kick plate to fold minor flap and activates the switch to close the bottom flap folder and hold the box in position. The operator then fills the box, and when once filled, the operator closes the minor and major flaps and pushes the box into the carton sealer. The operator then presses the green switch and 2 of the bottom flaps are opened allowing for the next box to be fed into the machine. The PP-563BE Pack Station can be paired with any uniform carton sealer.

## FEATURES

- Saves time and labor costs to close bottom flaps before loading
- Folding size:
  - L 250-500mm (10-20")
  - W 200-400mm (8-16")
  - H 100-500 mm (4-20")
- Locking casters
- Air: 1 CFM at 60 PSI
- Electrical: None required
- Warranty: 1 year on parts

Scale makes for easy height adjustment. Includes locking casters.

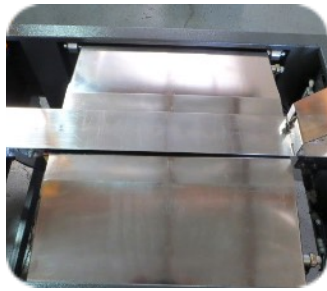

Once minor flap hits activation switch, bottom major flaps will be automatically folded.
