Summary

Going far beyond the capabilities of traditional digital color printers, the OKI C931e and C941e is a multimedia production platforms. It boasts a series of production-quality A3 (12x18") color devices and innovative features that will revolutionize the office and commercial printing industries. These new products go far beyond the capabilities of traditional digital color printers, adding game-changing media handling that includes transparent media, magnets, banners and heavyweight cardstock.

[Back to Top](#)

Multimedia

When it comes to variety, size and thickness of media, the C941e and C931e greatly extends the OKI heritage of media support. They easily handle 360 gsm (16pt /130lb cover) extra-thick card stock, polyester, magnetic media. Sizes range from 3" x 5" index cards up to 13" x 18" from the feed trays, and to 13" x 52" banners from the Multi-Purpose Tray (MPT).

[Back to Top](#)

Platform

This is not an office copier. C9 series printers have a printer-based engine, driven by an aggressive effort to create a rugged and affordable device. These presses feature short-run capacities, short-run speed, and deliver stunning output across the widest range of media. And by adding the optional EFI XF Server or Harlequin MultiRIP 10 for enhanced color management and simplified workflows, the C9 series is a formidable, professional device.

[Back to Top](#)

Affordability

With C9 series MSRP prices starting from \$6,099 (C931e) and \$22,199 (C941e) these high-quality digital presses are a value for most budgets. When printing with a C9 series machine, your high-quality 4-color jobs will cost on average approximately .0667 per 8.5" x 11" sheet based on industry average ISO coverage of 20%. With this consideration, an 11" x 17" will cost .1334 and a 13" x 52" banner approximately .45. Because of smaller sheet sizes and lighter coverage, applications like envelopes and letter will cost on average around .035 each.

[Back to Top](#)

Profitability

With the ability to print high-quality short-run color, competitively priced 8.5" x 11" and 11" x 17" flyers, letterhead, envelopes, narrow banners, etc. can provide margins to your business in excess of 80%. Often you can pay for your machine with as little as four 250 pc runs a month. Now you never have to turn away a short-run color job and you can double your investment returns in as little as eight new jobs per month. Also keep in mind, every time you prevent a customer from going elsewhere, you also retain a customer for future business.

Specifications (C931e & C941e)

- Print speed up to 50 ppm Color and Mono
- True 1200 x 1200 dpi resolution
- High-capacity toner: up to 38,000 pages
- Prints on a wide range of media, including envelopes, magnetic media, polyester, transparent film, and heavy stock up to 360 gsm
- Handles 3" x 5" cards to 52" banners
- Supports tabloid extra (12" x 18") and Super-B (13" x 19")
- (2-sided printing) standard
- Easy front access to toner cartridges and image drums
- High-resolution color LCD display panel with alphanumeric keypad
- Paper capacity expandable to 2,950 sheets
- Optional external RIP: EFI® XF Server or Harlequin® MultiRIP™ 10
- 2 GB memory, 1 Gigabit network and duplex

[Back to Top](#)

Unique Advantages

- Straight paper path
- LED imaging technology
- Auto calibration and density registration
- Wide media substrate flexibility
- High resolution imaging
- Compact design
- Environmentally friendly

[Back to Top](#)

Benefits

- Less jams in device
- More reliable imaging / better quality
- Color integrity
- Consistent color throughout
- Wider product offering to customers
- Environmentally friendly
- Retain valuable floor space

Maintenance and Contract Free

These machines are pretty much maintenance-free, and there are no contracts or “click charges” to contend with. All consumables are operator replaceable, and please reference the “consumables” price list to the right of this page for component pricing. With this printer, you have toner, image drums, fusers, transfer belts, and that is pretty much it!

[Back to Top](#)

OKI C9 Series Enhancements

- LED Printhead Advantages require no moving parts, lower fuser temperature, no mirrors to provide increased print time, productivity, print volumes, smaller dot sizes and greater print quality
- “New” Intermediate Transfer Belt (ITB) for improved image registration and quality, wider print media, better toner transfer across a wider range of media types, and extended yield
- “New” Image Drum Design for better image quality, quieter operation, and longer image drum life
- “New” Fuser Design for increased productivity, improved fusing, flatter printed media for better offline finishing, and expanded media flexibility including envelope printing.
- “New” Spot Color Feature (C941 only) 5th Imaging Station to support spot color toner.

[Back to Top](#)

C941 Supports 5th Color (Spot Color) White or Clear Gloss

- Prints with CMYK plus White or Clear toner
- 5th Imaging Station to support spot color toner (C941 only)
- White or Clear/Gloss toner can be added to documents in addition to CMYK
- Change between white and clear toner in as little as 2 minutes
- Spot Color Installation Kit Required for White and Clear
 - Kit includes Toner, Image Drum, and Toner Supply Duct
 - One kit required for each white and clear
 - After initial kit is purchased, image drums and toner is consumed and replaced like any other color. Kits include limited yield drums and toner, so for any production requirements, it is recommended that additional supplies be purchased.
- Max Engine Print Speed when using Spot Color
 - CMYK + White: (44.5 PPM)
 - CMYK + Clear: (16 PPM)
- Applications for White Toner
 - Production printing using color paper –Invitations, envelopes, etc.
 - POP/Signage printing on transparent film, cling film
 - Mock-up creation and design of packaging materials
- Apply White Toner First or Last
 - Use white text and graphics on dark-colored media. Make 4-color images on dark media stand out by laying down White toner first and printing CMYK on top—the same technique used for producing vibrant 4-color images on translucent media or transparency film.
- Applications for Clear Toner
 - Production Printing: catalogs, manuals, and photo books
 - Mock-up creation and design review (proofing)

Why Chose OKI?

OKI offers one of the best warranties in the business with 2-years (C931e) and 1-year (C941e) on-site and 5-years Digital LED Printheads. On-site warranty does not cover travel charges. Consult your sales professional for additional details.

OKI is a direct OEM manufacturer. When you own “OKI,” you are dealing direct with the manufacturer. OKI printers, like other manufacturer’s products in this class, are marked under numerous third-party brands. In addition to no third-party pricing markups which can exceed 20%, support is direct. Why pay a higher price for lessor support? As the owner of an “OKI” branded digital press, you can go direct to OKI for free support, 24/7 and 365 days a year. There is absolutely no middle-man.
