FOTOCREASER C47e™ **Large Format Electric Creaser**

Max creasing width 475 mm / 18.7"
Creases soft covers, photobook pictures, cards, menus
Light and compact table top unit

Versatile creasing machine

Fastbind FotoCreaser C47e™ is an electric table-top creasing machine, designed to score photo paper without altering the printing; thanks to this original design, the crease is precise and protects the quality of your pictures. The FotoCreaser C47e's consistent pressure guarantees a sharp regular crease in photographic paper as well as card, copy paper, PVC coated cardboard, and numerous other materials. This makes the FotoCreaser C47e the ideal tool for creasing photo book pictures, but also the perfect solution for your other creasing needs: soft covers, greeting cards, restaurant menus, advertising calendars, exhibition programs, invitations, brochures, folders...

Easy to operate

Thanks to its unique design, Fastbind FotoCreaser C47e is very easy to use. A simple thumb-screw along the measurement scale makes it easy to adjust the backstop to the format you're using. A second backstop is also available as option, to allow you to pre-set two crease distances. Accurate positioning couldn't be faster and simpler.

You make the crease either by pressing the foot pedal or the hand button. The precision creasing bar handles almost any paper and card up to 400 g/m² (or 220 lb index stock); regardless of the stock, you always obtain a consistent creasing result. Fastbind FotoCreaser C47e manages a large range of thicknesses thanks to its reversible blade: you quickly turn it to go from thicker to thinner materials.

Compact and fully-featured

Fastbind FotoCreaser C47e is the perfect tool for photographic studios, photo labs and professional photographers who seek the highest quality and protection of their photos. It also perfectly meets the needs of digital printers, copy shops and on-demand publishers. Light and compact, it fits naturally in any environment and covers all your short runs and on-demand creasing needs.

Fastbind FotoCreaser C47e™ is a compact, tabletop unit.

The reversible, quick-change blade makes it easy to switch from thicker to thinner materials.

Positioning is fast and easy with measurement scale.

Fastbind FotoCreaser C47e™ in photobook production

Fastbind FotoCreaser C47e™ is designed to be used in conjunction with Fastbind FotoMount F46e™ large format PhotoBook Maker. You can use photographic paper, card, laminated material or any print for your pictures, and you achieve an edge-to-edge panoramic view on each page. Crease your pictures with FotoCreaser C47e™ and use FotoMount F46e™ and Fastbind supplies to bind them into a book block. Use a cutter/guillotine to trim the block, then mount it to the hard cover of your choice. In a matter of minutes you can create a beautiful, professional photobook yourself, saving time and adding more profit to your bottom line!
